Versatile and lively on air talent with deep experience and expertise in presenting consumer technology news and commentary for a variety of audiences.

Professional Experience

CNET Networks, Inc.

August 1995 - February 2003

(CNET programming carried by USA NETWORK, SCI-FI CHANNEL, KPIX-TV and various international affiliates)
On-air host of television and radio broadcasts focusing on professional and consumer technology and their related business. Presented, wrote and produced a wide variety of business and technology feature segments for the following programs:

CNET Radio (KNEW 910AM S.F. / WBPS 890AM Boston / XM Satellite CH-130)
Hosted Middays Monday through Friday CNET Radio broadcast with an audience reach of over 7+ million people in the nation's 4th largest market and satellite radio. Heavy call-in participation and in-depth interviews with industry leaders and celebrities

CNET Central (Local Affiliates, USA Network, Sci-Fi Channel, International syndication)
Demonstration and explanation specialist. Hosted and produced weekly segments highlighting a new technology, device, or service complete with an on-camera demonstration of the subject in action. Also Hosted stories and conducted on-camera interviews for feature stories in studio and in the field.

Cool Tech (USA NETWORK, SCI-FI CHANNEL)
Show host and producer of segments for a show dedicated to a wide variety of consumer and non-consumer technologies and products.

The Web (USA NETWORK, SCI-FI CHANNEL)
Presented, wrote and produced video game reviews, short tutorial segments and interviews with internal and outside experts.

The New Edge (USA NETWORK, SCI-FI CHANNEL)
Presented various field pieces focusing on industrial strength technologies with future applications in everyday life.

CNET's News.com (CNBC)
Researched and prepared product demonstration segments and educated the show's hosts to be knowledgeable about them for air time.
